Re: Letter of Recommendation

To Whom It May Concern:

At times in a business cycle, there can be nothing more frustrating than keeping your back office IT and phone equipment up and running. My particular office had inherited an antiquated phone and network system from another office that was shut down. I can't say enough about how helpful Ben and the entire staff of SynerTel have been in keeping my IT and phone equipment up and running and allowing me to focus on my own customers.

Eventually I was able to shake loose enough money from my corporate office to purchase new equipment. Again SynerTel came through in flying colors. They presented me with multiple options that fit my needs and price range. The relocation and installation went smoothly and they once again afforded me the pleasure of being able to focus on my own business. Thank you Ben and the entire staff at SynerTel...

Sincerely

James Crinnion
