The busy Copymat shop at 455 Market had a challenge. Growing workload meant longer hours – but employee safety and protection of customer materials were a concern during off hours.

SynerTel has served CopyMat since 1996, first providing a modern telephone system, then a network redesign with massive online storage to allow efficient processing of Copymat's increasing digital workload while ensuring safety and security for proprietary customer originals.

Copymat asked SynerTel to help ensure employee safety, customer material security, and employee productivity during off hours.

SynerTel designed & installed a IP-based video security system, with cameras monitoring key points in customer and staff areas. Video is recorded and archived – and management can remotely monitor in real time, as well as access saved footage if needed.
